The Cigna Group, including the Company, are routinely involved in numerous claims, lawsuits, regulatory inquiries and audits, government investigations, including under the federal False Claims Act and state false claims acts initiated by a government investigating body or by a qui tam relator's filing of a complaint under court seal, and other legal matters arising, for the most part, in the ordinary course of managing a health services business. Additionally, The Cigna Group has received and is cooperating with subpoenas or similar processes from various governmental agencies requesting information, all arising in the normal course of its business. Disputed tax matters arising from audits by the Internal Revenue Service or other state and foreign jurisdictions, including those resulting in litigation, are accounted for under the NAIC's accounting guidance for tax loss contingencies.

As of March 31, 2023, there were no pending litigation or legal and regulatory matters determined to have a reasonably possible material loss for the Company.

Medicare Advantage. A qui tam action that was filed by a private individual on behalf of the government in the United States District Court for the Southern District of New York in 2017 was unsealed on August 6, 2020. The action asserts claims related to risk adjustment practices arising from certain health exams conducted as part of the Company's Medicare Advantage business. In September 2021, the qui tam action was transferred to the United States District Court for the Middle District of Tennessee. On January 11, 2022, the U.S. Department of Justice ("DOJ") (U.S. Attorney's Offices for the Southern District of New York and the Middle District of Tennessee) filed a motion to partially intervene, which was granted on August 2, 2022. On October 14, 2022, the DOJ filed its complaint-in-intervention alleging that certain diagnoses made during in-home exams were invalid for risk adjustment purposes, seeking unspecified damages and penalties under the federal False Claims Act. The Cigna Group filed motions to dismiss the DOJ's complaint and the remainder of the qui tam complaint on December 16, 2022. Briefing is complete and the matter is pending before the court.

Civil Investigative Demand. The U.S. DOJ is conducting industry-wide investigations of Medicare Advantage organizations' risk adjustment practices. For certain Medicare Advantage organizations, including The Cigna Group, those investigations have resulted in litigation. The Cigna Group has responded to information requests (civil investigative demands) from the DOJ (U.S. Attorney's Office for the Eastern District of Pennsylvania) and is continuing to cooperate with the DOJ.

Risk Adjustment Data Validation Audits. The Medicare Advantage (MA) business is subject to reviews, including Risk Adjustment Data Validation ("RADV") audits by CMS and the Office of the Inspector General ("OIG"). It is expected that CMS, OIG and other federal agencies will continue to closely scrutinize components of the Medicare program.

On January 30, 2023, CMS issued the Final Rule titled "Medicare and Medicaid Programs; Policy and Technical Changes to the Medicare Advantage, Medicare Prescription Drug Benefit, Program for All-inclusive Care for the Elderly (PACE), Medicaid Fee-For-Service, and Medicaid Managed Care Programs for Years 2020 and 2021", effective April 3, 2023. The Final Rule addresses CMS's audit methodology and related policies for the Risk Adjustment

Data Validation. RADV is the primary mechanism for CMS to determine risk adjustment revenue overpayments to Medicare Advantage organizations. Although CMS did not specify their sampling or extrapolation methodology the rule did codify that CMS will use a statistically valid method for sampling and extrapolation of error rates and the decision not to apply a fee for service adjuster when determining RADV audit findings. CMS will not apply extrapolation to RADV audits until the 2018 payment year with payment recoveries for those RADV audits expected in 2025. Audits for payment years prior to 2018 are not subject to extrapolation and the Company expects the impact for these years will not be material. The Company is not currently subject to RADV audits for the 2018 and subsequent payment years and is unable to estimate the potential impacts of RADV audits subject to extrapolation in the Final Rule. Although the Final Rule provides additional clarity regarding the structure of the methodology for RADV audits and quantification of RADV audit findings, further analysis is required to determine all potential implications. The Company continues to evaluate the recently announced Final Rule including potential legal developments which could impact the ultimate application of the regulation.

20. **Fair Value Measurements**

A. Fair Value Measurements

Fair value is defined as the price at which an asset could be exchanged in an orderly transaction between market participants at the balance sheet date. The Company's financial assets have been classified based upon a hierarchy defined by SAP. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's or a liability's classification is based on the lowest level input that is significant to its measurement. For example, a financial asset or liability carried at fair value would be classified in Level 3 if unobservable inputs were significant to the instrument's fair value, even though the measurement may be derived using inputs that are both observable (Levels 1 and 2) and unobservable (Level 3).

- Level 1 Inputs for instruments classified in Level 1 include unadjusted quoted prices for identical assets in active markets accessible at the measurement date. Active markets provide pricing data for trades occurring at least weekly and include exchanges and dealer markets.
- Level 2 Inputs for instruments classified in Level 2 include quoted prices for similar assets in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are market observable or can be corroborated by market data for the term of the instrument. Such other inputs include market interest rates and volatilities, spreads and yield curves. An instrument is classified in Level 2 if the Company determines that unobservable inputs are insignificant. Level 2 assets primarily include corporate bonds valued using recent trades of similar securities or pricing models that discount future cash flows at estimated market interest rates.
- Level 3 Certain inputs for instruments classified in Level 3 are unobservable (supported by little or no market activity) and significant to their resulting fair value measurement. Unobservable inputs reflect the Company's best estimate of what hypothetical market participants would use to determine a transaction price for the asset or liability at the reporting date.

SSAP 100 allows for the use of net asset value (NAV) as a practical expedient to fair value for investments in investment companies where there is no readily determinable fair value. There were no such investments owned by the Company for either period presented.

1. Fair Value Measurements at Reporting Date

The following tables provide information about the Company's financial instruments carried at fair value as of March 31, 2023 and December 31, 2022.

Financial Assets at Fair Value	Level 1	Level 2	Level 3	Net Asset Value (NAV)	Total
March 31, 2023					
Bonds	\$ —	\$ 104,439,233	\$ —	\$ —	\$ 104,439,233
Common stocks	506,748	—	—	—	506,748
December 31, 2022					
Bonds	—	102,574,620	—	—	102,574,620
Common stocks	665,107	—	—	—	665,107

2. Fair Value Measurements in Level 3 of the Fair Value Hierarchy

The following tables summarize the changes in financial instruments classified in Level 3 for the three months and three months ended March 31, 2023 and March 31, 2022. Gains and losses reported in these tables may include net changes in fair value that are attributable to both observable and unobservable inputs.

For the three months ended March 31, 2023

Level 3 Financial Assets	Beginning balance January 1, 2023	Transfers into Level 3	Transfers out of Level 3	Total gains (losses) included in Net Income	Total losses included in Surplus	Purchases	Issuances	Sales	Settlements	Ending Balance March 31, 2023
Bonds	\$ —	\$ —	\$ —	\$ —	\$ —	\$ —	\$ —	\$ —	\$ —	\$ —

For the three months ended March 31, 2022

Level 3 Financial Assets	Beginning balance January 1, 2022	Transfers into Level 3	Transfers out of Level 3	Total losses included in Net Income (1)	Total losses included in Surplus	Purchases	Issuances	Sales	Settlements	Ending Balance March 31, 2022
Bonds	\$ 5,784,800	\$ 26,977,132	\$ —	\$ 674,113	\$ (1,797,025)	\$ —	\$ —	\$ —	\$ (6,562,100)	\$ 25,076,920

3. Level 3 Transfers

Reclassifications impacting Level 3 financial instruments are reported as transfers in or out of the Level 3 category. Gains and losses in net income and surplus only reflect activity for the period the instrument was classified in Level 3. Transfers into or out of the Level 3 category occur when there is a change in the measurement basis in the period for lower-rated bonds valued at the lower of cost or fair value. Transfers into or out of Level 3 may also occur when observable inputs, such as the Company's best estimate of what a market participant would use to determine a current transaction price, become more or less significant to the fair value measurement. For the three months ended March 31, 2023, there were no transfers out of Level 3.

4. Valuation Techniques and Inputs

The Company estimates fair values using prices from third parties or internal pricing methods. Fair value estimates received from third-party pricing services are based on reported trade activity and quoted market prices when available, and other market information that a market participant may use to estimate fair value. Such other inputs include market interest rates and volatilities, spreads, and yield curves. The internal pricing methods are performed by the Company's investment professionals and generally involve using discounted cash flow analyses, incorporating current market inputs for

similar financial instruments with comparable terms and credit quality, as well as other qualitative factors. In instances where there is little or no market activity for the same or similar instruments, the fair value is estimated using methods, models, and assumptions that the Company believes a hypothetical market participant would use to determine a current transaction price.

B. Other Fair Value Disclosures

The Company provides additional fair value information in Note 5.

C. Aggregate Fair Value of All Financial Instruments

The following valuation methodologies and significant assumptions are used by the Company to determine fair value for each instrument.

Bonds

The Company estimates fair values using prices from third parties or internal pricing methods. Fair value estimates received from third-party pricing services are based on reported trade activity and quoted market prices when available, and other market information that a market participant may use to estimate fair value. Such other inputs include market interest rates and volatilities, spreads, and yield curves. The internal pricing methods are performed by the Company's investment professionals and generally involve using discounted cash flow analyses, incorporating current market inputs for similar financial instruments with comparable terms and credit quality, as well as other qualitative factors. In instances where there is little or no market activity for the same or similar instruments, the fair value is estimated using methods, models, and assumptions that the Company believes a hypothetical market participant would use to determine a current transaction price.

Commercial Mortgage Loans

The Company estimates the fair value of commercial mortgage loans generally by discounting the contractual cash flows at estimated market interest rates that reflect the Company's assessment of the credit quality of the loans. Market interest rates are derived by calculating the appropriate spread over comparable U.S. Treasury rates, based on the property type, quality rating and average life of the loan. The quality ratings reflect the relative risk of the loan, considering debt service coverage, the loan-to-value ratio and other factors. Fair values of impaired mortgage loans are based on the estimated fair value of the underlying collateral generally determined using an internal discounted cash flow model.

Cash, Cash Equivalents, and Short-Term Investments

Short-term investments, cash equivalents, and cash are carried at cost which approximates fair value. Short-term investments and cash equivalents are classified in Level 2, and cash is classified in Level 1.

D. Medical loss ratio rebates required pursuant to the Public Health Service Act

On January 1, 2014, the Company became subject to the minimum loss ratio rebate provisions of the Affordable Care Act (ACA). ACA require payment of premium rebates to customers covered under the Company's comprehensive medical insurance if certain annual minimum medical loss ratios are not met. At the close of each quarter, the Company records its rebate accrual based on year-to-date estimated medical loss ratios calculated as prescribed by the interim final rule issued by the Department of Health & Human Services using year-to-date premium and claim information by state and market segment. Since this accrual reflects the amount of rebate that would be payable based on year-to-date estimated medical loss ratios, the amount of rebate will fluctuate as actual claim experience develops each calendar quarter.

As of March 31, 2023, the Company accrued a rebate of \$1,848,061. No rebate was accrued as of December 31, 2022.
