NOTES TO THE FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of the Company are presented on the basis of accounting practices prescribed or permitted by the Illinois Department of Insurance.

The Illinois Department of Insurance (the Department) recognizes only statutory accounting practices prescribed or permitted by the State of Illinois for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under the Illinois Insurance Law. The National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures manual (NAIC SSAP) has been adopted as a component of prescribed or permitted practices by the State of Illinois. The Commissioner of Insurance has the right to permit other specific practices that deviate from prescribed practices. The Company, per the mandate of the Illinois Department of Insurance does not admit receivables from parent, subsidiaries, and affiliates in excess of the lesser of 5% of admitted assets or 10% of accumulated surplus, which is not in accordance with the NAIC SSAP. The omission of this prescribed practice would have had no impact to the results of the Company's risk-based capital calculations.

A reconciliation of the Company's net income and capital and surplus between NAIC SSAP and practices prescribed and permitted by the State of Illinois is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. These estimates are based on knowledge of current events and anticipated future events, and accordingly, actual results could differ from those estimates.

C. Accounting Policy

Premiums are reported as earned in the period in which members are entitled to receive services, and are net of retroactive membership adjustments. Retroactive membership adjustments result from enrollment changes not yet processed, or not yet reported by an employer group or the government. Premiums received prior to such period are recorded as advance premiums.

Benefits incurred and loss adjustment expenses include claim payments, capitation payments, pharmacy costs net of rebates, allocations of certain centralized expenses, legal and administrative costs to settle claims, and various other costs incurred to provide health insurance coverage to members, as well as estimates of future payments to hospitals and others for medical care provided prior to the date of the statements of admitted assets, liabilities and surplus. Capitation payments represent monthly contractual fees disbursed to participating primary care physicians, and other providers who are responsible for providing medical care to members. Pharmacy costs represent payments for members' prescription drug benefits, net of rebates from drug manufacturers.

In addition, the Company uses the following accounting policies:

- (1) Short-term investments include investments mainly in U.S. Government obligations with a maturity of twelve months or less from the date of purchase. Short-term investments are recorded at amortized cost. The carrying value of short-term investments approximates fair value due to the short-term maturities of the investments.
- (2-4) Investments are valued and classified in accordance with methods prescribed by the NAIC. Bonds with an NAIC rating of 1 or 2 are carried at amortized cost, with all other bonds being recorded at the lower of amortized cost or fair value; redeemable preferred stocks are carried at amortized cost; and non-redeemable preferred stocks are carried at fair value. Common stocks are carried at fair value.

The Company regularly evaluates investment securities for impairment. For all securities other than

NOTES TO THE FINANCIAL STATEMENTS

loan-backed and structured securities, the Company considers factors affecting the investee, factors affecting the industry the investee operates within, and general debt and equity market trends. The Company also considers the length of time an investment's fair value has been below carrying value, the near term prospects for recovery to carrying value, and the Company's intent and ability to hold the investment until maturity or market recovery is realized. If and when a determination is made that a decline in fair value below the cost basis is other-than-temporary, the related investment is written down to its estimated fair value through earnings.

Amortization of bond premium or discount is computed using the scientific interest method.

Income from investments is recorded on an accrual basis. For the purpose of determining realized gains and losses, the cost of securities sold is based upon specific identification. Investment income due and accrued over 90 days past due is nonadmitted.

- (5) Not Applicable.
- (6) For loan backed and structured securities where the securities fair value is less than the amortized cost, the Company considers several factors to determine if the security's impairment is other-than-temporary. If the Company has the intent to sell the security or if the Company does not have the intent and ability to retain the security until recovery of its fair value, the related investment is written down to its estimated fair value through earnings. If, however, the Company has the intent and ability to retain the security until recovery of its fair value, the Company considers factors affecting the investee, factors affecting the industry the investee operates within, and general debt and equity market trends. The Company also considers the length of time an investment's fair value has been below carrying value and the near term prospects for recovery to carrying value. If the determination is made, based on these factors, that the Company does expect to recover the entire amortized cost of the security, then an other-than-temporary impairment has not occurred. If, however, the determination is made that the Company does not expect to recover the entire amortized cost of the security based on the factors noted above, the Company recognizes a realized loss in earnings for the non-interest related decline. No loss is recognized for the interest impairment.
- (7) Not Applicable.
- (8) Not Applicable.
- (9) Not Applicable.
- (10-11) The estimates of future medical benefit payments are developed using actuarial methods and assumptions based upon claim payment patterns, medical cost inflation, historical development such as claim inventory levels and claim receipt patterns, and other relevant factors. Corresponding administrative costs to process outstanding claims are estimated and accrued. Estimates of future payments relating to services incurred in the current and prior periods are continually reviewed by management and adjusted as necessary.

The Company assesses the profitability of its contracts for providing health insurance coverage to its members when current operating results or forecasts indicate probable future losses. The Company records a premium deficiency liability in current operations to the extent that the sum of expected future medical costs, claim adjustment expenses and maintenance costs exceed related future premiums. Investment income is utilized in the calculation of the premium deficiency liability.

Management believes the Company's benefits payable and loss adjustment expense are adequate to cover future claims and loss adjustment expense payments required, however, such estimates are based on knowledge of current events and anticipated future events and, therefore, the actual liability could differ from the amounts provided.

- (12) The Company has not modified its capitalization policy from the prior period.

Equipment is stated at cost less accumulated depreciation. Depreciation expense is computed using the straight-line method over estimated useful lives generally ranging from three to five years. Improvements to leased facilities are depreciated over the shorter of the remaining lease term or the anticipated life of the improvement.

The Company recognizes an asset or liability for the deferred tax consequences of temporary differences between the tax basis of assets or liabilities and their reported amounts in the financial statements. The temporary differences will result in taxable or deductible amounts in future years when the reported amounts of the assets or liabilities are recovered or settled.

- (13) The Company estimates anticipated Pharmacy Rebate Receivables using the analysis of historical recovery patterns.
- (14) Not Applicable.
- (15) Not Applicable.

D. Going Concern

Management of the Company has evaluated the Company's ability to continue as a going concern under SSAP No. 1, *Accounting Policies, Risks & Uncertainties, and Other Disclosures* (SSAP No. 1). Based on this evaluation, Management has determined that there is no substantial doubt about the Company's ability to continue as a going concern.

(4) The Company does not have any investments in an other-than-temporary impairment position at December 31, 2024.

Gross unrealized losses and related fair value of temporarily impaired securities that have been in a continuous unrealized loss position were as follows at December 31, 2024:

(a) The aggregate amount of unrealized losses:

1. Less than Twelve Months	\$	(2,041,419)
2. Twelve Months or Longer	\$	(36,639,532)

(b) The aggregate related fair value of securities with unrealized losses:

1. Less than Twelve Months	\$	95,234,593
2. Twelve Months or Longer	\$	212,543,466

(5) Unrealized losses are primarily due to increases in market interest rates and tighter liquidity conditions in the current markets than when the securities were purchased. All issuers of securities trading at an unrealized loss remain current on all contractual payments and the Company believes it is probable that all amounts due according to the contractual terms of the debt securities are collectible. After taking into account these and other factors, including the severity of the decline and the Company's ability and intent to hold these securities until recovery or maturity, the Company determined the unrealized losses on these investment securities were temporary and, as such, no impairment was required.

NOTES TO THE FINANCIAL STATEMENTS

9. Income Taxes

The Inflation Reduction Act (Act) was enacted on August 16, 2022 and included a new corporate alternative minimum tax (CAMT). The Act and the CAMT went into effect for tax years beginning after 2022. The Company is an applicable corporation for 2024 as the average adjusted financial statement income for Humana Inc. and Subsidiaries for the applicable three-tax-year period exceeds the \$1 billion income-based threshold. However, the Company does not expect to incur a CAMT liability in 2024 as its regular tax liability is expected to exceed the tentative minimum tax. Further, no other taxable entities or taxable groups within the Company's structure are expected to exceed the average adjusted financial statement income threshold. The Company has not made an accounting policy election to disregard CAMT when evaluating the need for a valuation allowance for its non-CAMT DTAs.
