A. Accounting Practices

The financial statements of Arkansas Blue Cross and Blue Shield are presented on the basis of accounting practices prescribed or permitted by the Arkansas Insurance Department.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Health premiums are earned ratably over the terms of the related insurance and reinsurance contracts or policies. Expenses incurred in connection with acquiring new insurance business are charged to operations as incurred.

In addition, the company uses the following accounting policies:

- (1) Basis for Short-Term Investments
Short-term investments are stated at amortized cost.
- (2) Basis for Bonds, Mandatory Convertible Securities, SVO-Identified Investments and Amortization Method
Bonds not backed by other loans and are stated at amortized cost using the interest method.
- (3) Basis for Common Stocks
Common Stocks are carried at market except that investments in stocks of uncombined subsidiaries and affiliates in which the Company has an interest of 20% or more are carried on the equity basis.
- (4) Basis for Preferred Stocks
The Company does not have preferred stock.
- (5) Basis for Mortgage Loans
The Company does not have mortgage loans. The Company does own mortgage backed securities.
- (6) Basis for Loan-Backed Securities and Adjustment Methodology
Loan-backed securities are stated at either amortized cost or the lower of amortized cost or fair value. The prospective adjustment method is used to value all securities.
- (7) Accounting Policies for Investments in Subsidiaries, Controlled and Affiliated Entities
Common stock investments in affiliates including limited liability companies are carried at their NAIC SAP or GAAP equity values in accordance with the requirements of SSAP no. 97, Investments in Subsidiary, Controlled, and Affiliated Entities.
- (8) Accounting Policies for Investments in Joint Ventures, Partnerships and Limited Liability Entities
The Company has investments in joint ventures, partnerships and limited liability companies. See (7) above for accounting policy
- (9) Accounting Policies for Derivatives
The Company does not have derivatives.
- (10) Anticipated Investment Income Used in Premium Deficiency Calculation
The Company does include anticipated investment income as a factor in the premium deficiency calculation.
- (11) Management's Policies and Methodologies for Estimating Liabilities for Losses and Loss/Claim Adjustment Expenses
When setting reserves, the Company employs the 5 methods that are described below. Based on the estimates of these methods and also retrospective considerations, the company sets a best estimate and then an explicit margin is added to ensure that the estimate is sufficient. The average of the methods, as well as the spread of the estimates, is also considered when setting the respective liabilities. Aggregate liabilities are tested against other aggregate estimation methods to check for reasonableness, and any additional margin or adjustments are made
 - a. Aggregate Method: 12 months of paid claims are subtracted from 12 months of estimated incurred claims to get the liability estimate
 - b. 3 Month Average Method: For the base liability estimate, the average liability of the third, fourth, and fifth month prior to the current month is used. Adjustments are made for trend, membership change, and backlog to determine the current month's estimate of liability.
 - c. Previous Year's IBNR Method This method is similar to the Three Month Average Method, except that the actual reserve from one year ago is used as the base estimate of liability. This is projected forward using adjustments for trend, membership change, and backlog.
 - d. CY Lag Method: This method calculates completion factors by incurral year. Completion factors used for the current year are based on the previous year's experience. Completion factors for the most recent 3 years are set manually.
 - e. 12 Month CF Method: This method is identical to the CY Lag Method, except that historical completion factors are based on 12 months of rolling data.
- (12) Changes in the Capitalization Policy and Predefined Thresholds from Prior Period
No change in the capitalization policy this year.
- (13) Method Used to Estimate Pharmaceutical Rebate Receivables
Pharmacy rebate receivable estimates are based upon the prior quarter's invoiced amounts

D. Going Concern

For the period ending March 31, 2021 management has evaluated the Company's ability to continue as a going concern. Management has concluded that there is not substantial doubt that the Company can continue as a going concern, therefore, there are no policies in place to alleviate such situations.

(1) For fixed-rate agency mortgage-backed securities, Clearwater Analytics calculates prepayment speeds utilizing Mortgage Industry Advisory Corporation (MIAC) Mortgage Industry Medians (MIMs). MIMs are derived from a semi-monthly dealer-consensus survey of long-term prepayment projections. For other mortgage-backed, loan-backed, and structured securities, Clearwater utilizes prepayment assumptions from Moody's Analytics. Moody's applies a flat economic credit model and utilizes a vector of multiple monthly speeds as opposed to a single speed for more robust projections. In instances where Moody's projections are not available, Clearwater uses data from Reuters, which utilizes the median prepayment speed from contributors' models.
